

TouchNav

Security is just a touch away

Hills Reliance TouchNav offers simple fingertip control of your Hills Reliance security system with an intuitive graphical interface and 3.5" touch screen. It has the ability to support up to 128 zones, 99 users, 8 areas and 16 outputs – satisfying the requirements of residential homes, medium offices, retail shops and all the way up to large warehouses and multi-tenant buildings.

TouchNav Features (S3237A)

Touch Screen

TouchNav features an intuitive graphical interface within a 3.5" colour touch screen, which can be operated with any pointing device (e.g. gloved finger or nail).

Scalability

Capable of satisfying the needs of smaller residential homes to larger commercial applications, the TouchNav can handle up to 128 zones, 8 areas, 16 outputs (e.g. lights, garage doors) and 99 users.

Quick Keys

Control and manage your security system quickly and seamlessly through the code pads 3 quick keys for Away arming, Stay arming and System status.

Inbuilt Message Board

The convenience of an inbuilt message board feature allows users to leave reminder messages for other people when arming or disarming.

Custom Naming

End-users can customise user names, zones, areas, outputs and rooms.

Access Control

TouchNav allows easy management of swipe cards and authority levels when the keyless door entry card reader (NX1701EAU) is installed.

TouchNav

TouchNav Pro Additional Features (S3485A)

Video Integration (through a CCTV camera)

Feel secure by monitoring your premises with live motion video with the TouchNav's video input feature.

Intercom Functionality (up to 8 rooms)

Connect and talk with people in other rooms (through additional code pads) with the TouchNav's one-touch, hands-free intercom feature.

Monitoring Mode (up to 8 rooms)

Monitor other rooms to ensure your home or office is secure (e.g. listening into a baby's room). Privacy mode also available. the TouchNav's one-touch, hands-free intercom feature.
